Dear Parent/Carer

### International Students Science Fair

Horsforth School have attended Ritsumeikan High School's 'Annual Super Science Fair' in Japan, Kyoto for the past 12 years. The science fair takes place during November and lasts for 5 days.

The International Students Science Fair was initiated for the purpose of facilitating international exchange and interaction in science education, based on science project presentations delivered by high school students from all over the world. We are looking for students who show a real passion and commitment to the sciences and are enthusiastic and outgoing. In order to be considered for the trip you need to study a science at A-level next year.

Students also need to make a contribution towards payment of the trip of around £800 which can be paid in instalments. This will cover flights, travel, accommodation and food during the stay.

In order to apply you need to write a statement of interest to include the following key points:

1. Why you should be considered
2. Project idea
3. Your reasons for visiting Japan

All letters of application need to be e-mailed to [mcdonam02@horsforthschool.org](mailto:mcdonam02@horsforthschool.org) by Monday 5 June 2017. You must include a contact telephone number or email address as we will contact students directly to arrange an interview which will last around 10mins. At the interview, you will be asked to present your project ideas and answer questions. Interviews will take place the week beginning 26 June 2017.

Yours sincerely,

Miss M V McDonald  
Leader KS5 Applied Science
